STATINTL

Dear [REDACTED]

Reference is made to your memorandum of November 28, 1951, addressed to the Superintendent of the Monument Group, requesting that sufficient air conditioning equipment be installed in each bay on the second floor of Temporary Buildings "I" and "J", to provide adequate working conditions in these buildings. You indicated in your memorandum that the second floors of these buildings had been equipped with air conditioning equipment which was removed approximately two years ago.

It is regretted that it was necessary to use the units that were removed several years ago in other buildings to serve pressing needs. It is also regretted that no additional units are available for installation on the second floors of Temporary Buildings "I" and "J" at this time and information received indicates that funds will not be available next spring to purchase any appreciable number of air conditioning units.

Very truly yours,

/s/ W. B. Montgomery (s)
W. B. Montgomery
